Select the appropriate responses below (Yes, No, Not Applicable) to note compliance as a recipient of Incremental High Cost support, High Cost support to offset access charge reductions, and Connect America Phase II support as set forth in 47 CFR § 54.313(b),(c),(d),(e). The information reported on this form and in the documents attached below is accurate.

Incremental Connect America Phase I reporting

- <2011> 3rd Year Certification 47 CFR §54.313(b)(1)(ii) - Note that for the July 2017 certification, this applies to Round 2 recipients of Incremental Support.
- <2022> Recipient certifies, representing year three after filing a notice of acceptance of funding pursuant to 54.312(c), that the locations in question are not receiving support under the Broadband Initiatives Program or the Broadband Technology Opportunities Program for projects that will provide broadband with speeds of at least 4 Mbps/1Mbps - 54.313(b)(2)(i). Round 2 recipients only.
- <2023> The attachment on line 2024 includes a statement of the total amount of capital funding expended in the previous year in meeting Connect America Phase I deployment obligations, accompanied by a list of census blocks indicating where funding was spent. This covers year three - 54.313(b)(2)(ii). Round 2 recipients only.
- <2024A> Round 2 Recipient of Incremental Support?
- <2024B> Attach list of census blocks indicating where funding was spent in year three - 54.313(b)(2)(ii). Round 2 recipients only.
- <2025A> Round 2 Recipient of Incremental Support?
- <2025B> Attach geocoded Information for Phase I milestone reports (Round 2 for year three) - Connect America Fund , WC Docket 10-90, Report and Order, FCC 13-73, paragraph 35 (May 22, 2013).
- <2015> 2016 and future Frozen Support Certification 47 CFR § 54.313(c)(4)

4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission’s public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year.

Name of Attached Document Listing Required Information

Broadband Deployment Locations – FCC 14-98 (paragraph 80)

4004a. Attach a list of geocoded locations to which broadband has been deployed as of the June 1st immediately preceding the July 1st filing deadline for the FCC Form 481.

Name of Attached Document Listing Required Information

4004b. Attach evidence demonstrating that the recipient is meeting the relevant public service obligations for the identified locations. Materials must at least detail the pricing, offered broadband speed and data usage allowances available in the relevant geographic area.

Name of Attached Document Listing Required Information

JBN Telephone Company, Inc.
Line 330 – Unfulfilled Broadband Service Requests Resolution

As required in 47 C.F.R. § 54.313(a)(3), the following provides the detailed description of how the Company attempted to provide service to potential customers whose initial requests for service were unfulfilled in 2016 in the service area in which the Company is designated as an ETC for facilities that the Company owns, operates, leases, or otherwise utilizes.

UNFILLED BROADBAND SERVICE REQUESTS – The Company had 45 unfilled broadband service requests as of December 31, 2016, which generally fit into the following three categories:

- A. CUSTOMER ISSUES: Some unfilled requests were due to customer issues such as the customer does not have a structure yet, the customer was not ready, the customer has not provided an easement, etc.
- B. PERMITS: Some unfilled requests were due to pending permits.
- C. LONG LOOPS: Due to extremely long loop lengths from the customer location to the nearest electronics site, most unfilled requests are receiving broadband service, just not at the higher speed they would like at this time. In most cases, a new section of fiber and a new electronic site (e.g., Digital Loop Carrier (“DLC”)) would need to be installed.

Reasonable request computations were computed for each of the 45 unfilled broadband service requests and the results are as follows:

Ten (10) of these customers are undergoing network analysis for potential upgrading in 2017.

Two (2) of these customers are able to receive at least 4/1 speeds today.

Thirty-three (33) customers do not meet our reasonable request requirement and are included in future plant improvements. Each of these 33 customers have very long loop lengths and the placement of an additional DLC is required to remediate speeds. In conjunction with the ACAM construction plan, all of these customers will be addresses within the next 10 years. Construction projects are prioritized by the total number of subscribers that can be remediated.

In addition to the 10 subscribers under current review, additional remediation for 12 subscribers is planned in the next three years.

- 2017 planned upgrades: 1 customer
- 2018 planned upgrades: 8 customers
- 2019 planned upgrades: 3 customers

The remaining customers are all included in the remaining years. These plans and the reasonable request computation are reviewed periodically.

GENERAL PROCESS: The first step in the process of providing service was to have the Company's technical staff determine if current facilities exist to the customer location that are capable of providing broadband service and what the maximum broadband speed that could be provided. The Company has extremely long loops in some of the most rural portions of our territory and broadband speed is extremely distance sensitive.

Based on the analysis, once it was determined that facilities do not currently exist or that the distance is too great to provide broadband, a route upgrade feasibility analysis is prepared including an estimate of what facilities would be needed and the cost to build to the customer.

DELAYS DUE TO PERMITS: In some cases, service installations become delayed due to permit(s) that are required to install the new facilities. The Company works with a myriad of government agencies and cannot install new facilities absent the appropriate government permit(s). In those cases, the Company informs the customer that we are awaiting permit(s) and that the facilities will be installed once the appropriate permit(s) are obtained. In some cases, the governmental agency has taken multiple years to approve permit(s).

Please note that since the Company's territory is extremely rural, in areas where the Company does not own facilities, it is not possible to lease facilities from other companies since there are no other service providers in those extremely remote areas.

JBN Telephone Company, Inc.

Line 510 –Compliance with Service Quality Standards and Consumer Protection

As required in 47 C.F.R. § 54.313(a)(5) for High-cost Recipients, the following is a detailed description of how the Company complies with Service Quality Standards and Consumer Protection Rules.

SERVICE QUALITY STANDARDS: The Company abides by the State Commission’s requirements for service quality. All required reporting is done with the Company in full compliance of the service quality standard requirements.

CONSUMER PROTECTION RULES:

The Company developed and implemented a Customer Proprietary Network Information (“CPNI”) Compliance Manual and has appointed a CPNI Compliance Officer. Annually, the Company requires all employees to certify that they have reviewed and understand the CPNI Compliance Manual and that they understand that any violation of the Company’s CPNI procedures may result in disciplinary action up to and including dismissal. The Company files an annual report with the Federal Communications Commission (“FCC”) certifying compliance with the FCC’s CPNI rules.

The Company also developed and implemented an Identity Theft Prevention Program Manual and has appointed a Red Flag Coordinator. Annually, the Company requires all employees certify that they have reviewed and understand the Identity Theft Prevention Program Manual. Further, employees must certify that they understand that any violation of the Company’s identity theft prevention procedures may result in disciplinary action up to and including dismissal.

JBN Telephone Company, Inc.
Line 610 – Functionality in Emergency Situations

As required in 47 C.F.R. § 54.313(a)(6) for all high cost recipients, which includes the Company, and as set forth in 47 C.F.R. § 54.202(a)(2), the following provides a detailed description demonstrating that the Company has the ability to remain functional in emergency situations, including a demonstration that 1) it has a reasonable amount of back-up power to ensure functionality without an external power source, 2) is able to reroute traffic around damaged facilities, and 3) is capable of managing traffic spikes resulting from emergency situations.

OVERALL RESPONSE TO EMERGENCY SITUATIONS: The Company has a comprehensive disaster recovery plan (also called a “continuity plan”) that was developed and implemented for the Company specifically to deal with emergencies. It has detailed, specific steps that are to be taken for each type of emergency.

POWER: In order to function in an emergency, the Company has a combination of batteries and emergency generators. Some locations have permanent emergency generators with fuel tanks; whereas, other locations require a portable generator to be brought to the location to recharge the on-site batteries. The company owns several portable generators that technicians can take out to recharge the batteries. For example, the company’s central offices have automatic stand-by generators to run the entire offices. The digital loop carrier (“DLC”) sites also have battery back-up.

REROUTING TRAFFIC AND REDUNDANCY: The Company has established 100% redundant E-911 trunks and SS-7 routes. In addition, the network was designed with redundancy, wherever possible, especially in the backbone network. Where it is not redundant, the Company has the ability to redirect most backbone traffic. In cases where there is no redundancy, it is due to the extreme cost of a 100% redundant network. For example, the loop to the customer location is typically not redundant, especially for residential customers. This is because it would not be cost effective to build totally separate facilities for the “last mile” to the customer.

MANAGING TRAFFIC SPIKES: The Company realizes that when a catastrophe happens, everyone immediately tries to contact friends and family to make certain they are all right. The Company has designed the network to have excess capacity on its backbone network. For example, on Mother’s Day, the company handles traffic without the customer receiving the “All Trunks Busy” message which demonstrates the Company’s ability to handle peak traffic spikes.

JBN Telephone Company, Inc.
Line 920 – Tribal Land Issues

As required in 47 C.F.R. § 54.313(a)(9), the following provides the detailed description of the efforts by the Company related to discussions with Tribal governments that, at a minimum, included: (i) A needs assessment and deployment planning with a focus on Tribal community anchor institutions; (ii) Feasibility and sustainability planning; (iii) Marketing services in a culturally sensitive manner; (iv) Rights of way processes, land use permitting, facilities siting, environmental and cultural preservation review processes; and (v) Compliance with Tribal business and licensing requirements. Tribal business and licensing requirements include business practice licenses that Tribal and non-Tribal business entities, whether located on or off Tribal lands, must obtain upon application to the relevant Tribal government office or division to conduct any business or trade, or deliver any goods or services to the Tribes, Tribal members, or Tribal lands. These include certificates of public convenience and necessity, Tribal business licenses, master licenses, and other related forms of Tribal government licensure.

Line 921 – Needs Assessment and Deployment Planning: The Company's actions to address needs assessment and deployment planning with a focus on tribal community anchor institutions for the tribal land network are as follows: Four phone calls were made to Fred Thomas with the Kickapoo Tribe between the dates of June 12th and June 19th, 2017. The Company made contact with Mr. Thomas on June 19th, 2017 and he stated they had no need for any services to be added or updated at this time.

Line 922 – Feasibility and Sustainability Planning: The Company's actions to address feasibility and sustainability planning for the tribal land network are as follows: As discussed above, the JBN Telephone Company's limited success with Tribal engagement has minimized Tribal supported initiatives associated with facility expansion to provide additional or increased service offerings.

Line 923 – Marketing Services in a Culturally Sensitive Manner: The Company's actions to address the marketing of services in a culturally sensitive manner in the tribal land are as follows: As discussed above, JBN Telephone Company tried, with limited success, to engage the Tribe to discuss if the Tribe had any suggestions or ideas for improving the company's marketing efforts.

Line 924 – Compliance with Right of Way Processes: The Company's actions to comply with the right-of-way processes for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss right-of-way processes for its tribal lands. Historically, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 925 – Compliance with Land Use Permitting Requirements: The Company's actions to comply with the land use permitting requirements for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss compliance with the land use permitting requirements for its tribal lands. As identified on Line 924, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 926 – Compliance with Facility Siting Rules: The Company's actions to comply with the facilities siting rules for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss and establish requirements and define compliance with the siting rules for its tribal lands. As identified on Line 924, JBN Telephone Company has complied with any regulations, set forth

by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 927 – Compliance with Environmental Review Processes: The Company's actions to comply with the environmental review processes for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss compliance with the environmental review processes for its tribal lands. As identified on Line 924, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 928 – Compliance with Cultural Preservation Review Processes: The Company's actions to comply with the cultural preservation review processes for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss compliance with the cultural preservation review processes for its tribal lands. As identified on Line 924, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 929 – Compliance with Tribal Business and Licensing Requirements: The Company's actions to comply with the tribal business and licensing requirements for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss if the Tribe believes there are other licenses the Company should acquire to provide telecommunications services on its tribal lands.

File name: 411785ks1010.pdf

JBN Telephone Company, Inc.
Line 1010 – Voice Services Rate Comparability

As required in 47 C.F.R. § 54.313(a)(10), any recipient of high-cost support shall provide a letter certifying that the pricing of the company's voice services is no more than two standard deviations above the applicable national average urban rate for voice services, as specified in the most recent public notice issued by the Wireline Competition Bureau and Wireless Telecommunications Bureau.

The following provides the Company's support for Line 1010 - Description of Voice Service Rate Comparability.

The Company charges the following fixed voices prices:

Flat Rate Residential Service	\$17.00
State Residential Subscriber Line Charge	0.00
State Universal Service Charge Fee	\$1.53
Mandatory Extended Area Service	0.20
Residential Federal Subscriber Line Charge	<u>\$6.50</u>
Total Residential Fixed Voice Charges	<u>\$25.23</u>

Since the total for basic residential fixed voice that the Company charges, as shown above, is above the 2016 rate floor for voice services of \$22.49 and below the reasonable comparability benchmark for voice services of \$49.51, announced by the FCC Wireline Competition Bureau in the Public Notice released on February 14, 2017 (DA 17-167), the Company certifies that the pricing of its basic residential voice services is no more than \$49.51 and the Company hereby certifies that it is in compliance with 47 C.F.R. § 54.313(a)(10).

File name: 411785ks1030.pdf

JBN Telephone Company, Inc.
Line 1030 – Broadband Comparability

In a December 2014 Order (FCC 14-90), paragraphs 119-123, the FCC created Section 54.313(a)(12) which requires recipients of High Cost Program and/or Connect America Fund support that are subject to broadband performance obligations to submit a broadband reasonable comparability rate certification.

The following provides the Company's support for Line 1020 - Description of Broadband Service Rate Comparability.

As of January 1, 2017, the Company charges the following residential broadband price, where available:

Copper

Download Speed	12Mbps
Upload Speed	1Mbps
Usage Allowance	Unlimited
TOTAL RESIDENTIAL	\$78.68

As shown above, the Company provides a 12 Mbps x 1 Mbps for \$78.68. Since the total for residential broadband that the Company charges, as shown above, is below the \$80.38 rate for 12 Mbps x 1 Mbps with the unlimited usage allowance computed using the FCC Reasonable Comparability Benchmark Calculator at <https://www.fcc.gov/general/reasonable-comparability-benchmark-calculator>, and since 12 Mbps x 1 Mbps give greater broadband speed than 10 Mbps x 1 Mbps, which is the reasonable comparability benchmark for broadband service announced by the FCC Wireline Competition Bureau in the Public Notice released February 14, 2017 (DA 17-167), the Company hereby certifies that it is in compliance with 47 C.F.R § 54.313(a)(12).

Fiber

Download Speed	10Mbps
Upload Speed	2Mbps
Usage Allowance	Unlimited
TOTAL RESIDENTIAL	\$68.68

As shown above, the Company provides a 10 Mbps x 2 Mbps for \$68.68. Since the total for residential broadband that the Company charges, as shown above, is below the \$77.98 rate for 10 Mbps x 0 Mbps with the unlimited usage allowance computed using the FCC Reasonable Comparability Benchmark Calculator at <https://www.fcc.gov/general/reasonable-comparability-benchmark-calculator>

comparability-benchmark-calculator, and since 10 Mbps x 2 Mbps give greater broadband speed than 10 Mbps x 1 Mbps, which is the reasonable comparability benchmark for broadband service announced by the FCC Wireline Competition Bureau in the Public Notice released February 14, 2017 (DA 17-167), the Company hereby certifies that it is in compliance with 47 C.F.R § 54.313(a)(12).

JBN Telephone Company Lifeline Terms and Conditions

The Lifeline Service Program (Lifeline), sponsored by the FCC is a program designed to maintain and preserve universal service by providing a reduction in the price of basic residential exchange service to qualifying low-income customers. The Company's voice lifeline plan includes unlimited local minutes-of-use within the toll-free calling area. The Company's voice lifeline plan does not include any free minutes-of-use for toll.

A. GENERAL

1. Lifeline is a federally funded reduction of basic local residential service. The Federal credit amount (CR) provided to Lifeline subscribers will be the maximum amount authorized by the FCC.
 - a. Lifeline customers will also receive additional Lifeline Service reductions in intrastate local service of \$7.77.
 - b. In no event shall the Local Exchange access service rate be reduced below zero.
2. Local service for Lifeline customers may not be disconnected for nonpayment of toll charges.
 - a. Toll Restriction Service will be provided to Lifeline customers at no charge.
 - b. Lifeline customers are not required to accept Toll Restriction Service as a condition to avoid disconnection of local service for non-payment of toll.
 - c. Lifeline customers are not required to pay a deposit in order to obtain local service if the customer voluntarily elects installation of Toll Restriction Service.
3. Partial payment from Lifeline customers will be applied first to local service charges and then to toll charges.
4. Lifeline customers will not be denied reestablishment of service on the basis that the customer was previously disconnected for non-payment of toll charges.
5. Lifeline will not be furnished on a Foreign Exchange service arrangement.

B. ELIGIBILITY REQUIREMENTS

1. Lifeline will be provided for on (1) telephone line per household, at the customer's principal place of residence who have only on local exchange access line to his/her residential premises or dwelling place.* Verification of this requirement will be through self-certification.
2. Show that he/she is currently a recipient of benefits from one of the following public assistance programs:
 - Federal Public Housing Assistance/Section 8
 - Supplemental Nutrition Assistance Program
 - Supplemental Security Income (SSI)
 - Medicaid
 - Individuals living on tribal land receiving:
 - Food Distribution Program
 - Bureau of Indian Affairs General Assistance
 - Tribally administered Temporary Assistance for Needy Families (TANF)
 - Head Start (tribal programs for only those meeting it's income qualifying standard)
 - Federal Veteran Pension or Survivor Benefit

Individuals choosing this option must obtain and provide to the Telephone Company a copy of a valid identification card or the appropriate documents that are issued to them by the agency administering the program.

Income Eligibility

A customer shall be eligible for the Lifeline Service Program if that customer's household annual income level is at or below 150% of the federal poverty level. Such customers may obtain a form from the Telephone Company suitable for self-certification of income level and provide the completed form to the Company to begin service under the program. Proof of income is required. Acceptable documentation may include the prior years federal, state, or tribal tax return, or other forms of income certification. Customers should contact the Company for specific details.

Certification

- o. The customer will certify eligibility for Lifeline Service. Recertification is required annually or at any time the qualifying criteria for the customer changes.

Recipients of Lifeline Service must notify the Telephone Company when they no longer qualify for Lifeline Service. Upon receipt of the notification, the Telephone Company will discontinue Lifeline Service.

If the Telephone Company discovers that conditions exist that disqualify the recipient of Lifeline Service, local service will be billed at the full rate. The customer will be billed retroactively either to the date Lifeline Service commenced or the date the recipient no longer qualified for the service, not to exceed twelve (12) months.

*A residential premises or dwelling place is that location where a customer resides, even if such residential premises or dwelling place is only a single room. Lifeline will not be provided if the customer has access to other local exchange telephone service within the residential premises or dwelling place, provided/owned by himself/herself or owned/provided by others. However, it can be determined by the Telephone Company that access to other existing local exchange telephone service owned/provided by others is virtually denied, or is inaccessible to the customer, then Lifeline Service will be provided.

JBN Telephone Company, Inc.
Line 3010 – Certification of Public Interest Obligations

As required in 47 C.F.R. § 54.313(f)(1)(i), any rate-of-return ETC receiving support must certify it has taken reasonable steps to provide upon reasonable request broadband service at actual speeds of at least 10 Mbps downstream/1 Mbps upstream, with latency suitable for real-time applications, including Voice over Internet Protocol, and usage capacity that is reasonably comparable to comparable offerings in urban areas, and that requests for such service were met within a reasonable amount of time.

With this document, the Company hereby certifies that it has taken reasonable steps to provide upon reasonable request broadband service at actual speeds of at least 10 Mbps downstream/1 Mbps upstream, with latency suitable for real-time applications, including Voice over Internet Protocol, and usage capacity that is reasonably comparable to comparable offerings in urban areas, and that requests for such service were met within a reasonable amount of time as required by 47 C.F.R. § 54.313(f)(1)(i).

In locations where 10 Mbps downstream/1 Mbps upstream, with latency suitable for real-time applications, including Voice over Internet Protocol, and usage capacity that is reasonably comparable to comparable offerings in urban areas, cannot be provided currently, a reasonable request financial analysis is performed based on the requirements included in the FCC Orders related to reasonable requests including those shown on the following pages.

If the request meets the qualifications of the reasonable request analysis, broadband service at actual speeds of at least 10 Mbps downstream/1 Mbps upstream, with latency suitable for real-time applications, including Voice over Internet Protocol, and usage capacity that is reasonably comparable to comparable offerings in urban areas, is provided within a reasonable amount of time as required by 47 C.F.R. § 54.313(f)(1)(i).

If the request does not meet the qualifications of the reasonable request analysis, broadband service is analyzed at actual speeds of at least 4 Mbps downstream/1 Mbps upstream and if that analysis meets the qualifications of the reasonable request analysis, broadband service is provided at actual speeds of at least 4 Mbps downstream/1 Mbps upstream as required by the FCC rules and regulations within a reasonable amount of time as required by 47 C.F.R. § 54.313(f)(1)(i).

If the reasonable request analysis does not meet the qualifications for either the 10 Mbps or the 4 Mbps reasonable request analysis, the customer is informed that broadband service cannot be provided at this time at either of those speed levels and provided information on what speed level would be available at their location. The reasonable request analysis is retained and recomputed if significant conditions change, as required by the FCC rules and regulations.

CERTIFICATION: The Company certifies that it is in compliance with the FCC Rules and Regulations and all appropriate documents are being filed as required by 47 C.F.R. § 54.313(f)(1)(i). The certification by an officer of the Company is included as part of the overall certification for the Form 481, which includes all attachments and is made by an officer of the Company whose responsibilities include ensuring the accuracy of the annual reporting requirements for universal service support recipients. The overall Form 481 certification is made that to the best of the officer's knowledge, the information reported on the Form 481, including attachments, is accurate.

Primary FCC Orders Relating to “Reasonable Requests” for Broadband Service

In its 2011 *USF/ICC Transformation Order*¹ the Commission required rate-of-return carriers receiving Universal Service Fund (USF) support to provide their customers with “at least the same initial minimum level of broadband service as those carriers who receive model-based support”² Recognizing RLECs’ generally small size, however, the Commission determined these carriers “should be provided greater flexibility in edging out their broadband-capable networks in response to consumer demand.” More specifically, the Commission stated that, “[u]pon receipt of a reasonable request for service, carriers must deploy broadband to the requesting customer within a reasonable amount of time.”³

In its 2012 *Third Order on Reconsideration*,⁴ the Commission clarified that its rules “provide sufficient flexibility to take into account any unique circumstances that may impact the ability of rate-of-return companies to extend broadband to their customers, including backhaul costs.”⁵

Later, in its 2014 *Seventh Order on Reconsideration*, the Commission acknowledged that there remained “some ambiguity” as to what would constitute an unreasonable request for service.⁶ It accordingly included a *Declaratory Ruling* to clarify matters.⁷

The *Declaratory Ruling* first suggests that rate-of-return carriers evaluating a request to extend broadband service should consider:

¹ See *Connect America Fund; A National Broadband Plan for Our Future; Establishing Just and Reasonable Rates for Local Exchange Carriers; High-Cost Universal Service Support; Developing a Unified Intercarrier Compensation Regime; Federal-State Joint Board on Universal Service; Lifeline and Link-Up; Universal Service Reform – Mobility Fund*; WC Docket Nos. 10-90, 07-135, 05-337, 03-109, CC Docket Nos. 01-92, 96-45, GN Docket No. 09-51, WT Docket No. 10-208, Report and Order and Further Notice of Proposed Rulemaking, 26 FCC Rcd. 17663 (2011) (*USF/ICC Transformation Order*).

³ *Id.* ¶ 208.

⁴ See *Connect America Fund et al.*, WC Docket No. 10-90, *et. al.*, Third Order on Reconsideration, 27 FCC Rcd. 5622 (2012) (*Third Order on Reconsideration*).

⁵ *Id.* ¶ 46.

⁶ *Connect America Fund*, WC Docket No. 10-90, *Universal Service Reform – Mobility Fund*, WT Docket No. 10-208, *ETC Annual Reports and Certifications*, WC Docket No. 14-58, *Establishing Just and Reasonable Rates for Local Exchange Carriers*, WC Docket No. 07-135, *Developing an Unified Intercarrier Compensation Regime*, CC Docket No. 01-92, Report and Order, Declaratory Ruling, Order, Memorandum Opinion and Order, Seventh Order on Reconsideration, and Further Notice of Proposed Rulemaking, FCC 29 FCC Rcd. 1175 (2014) ¶ 64 (*Seventh Order on Reconsideration*).

⁷ *Id.* ¶ 59.

whether it would be reasonable to make the necessary upgrades in light of anticipated end-user revenues from the retail provision of broadband service and other sources of revenues, including but not limited to federal or state universal service funding projected to be available under current rules. In considering end-user revenues, carriers should take into account the reasonable comparability benchmark for broadband services. If the incremental cost of undertaking the necessary upgrades to a particular location exceed the revenues that could be expected from that upgraded line, a request would not be reasonable.⁸

The Declaratory Ruling then specifically relates determination of unreasonable requests to the \$250/line cap on total high cost support imposed by the 2011 USF/ICC Transformation Order:

[A] request is not reasonable if it would require a carrier to undertake new network upgrades to install new backhaul facilities or to replace existing copper lines to the home with fiber merely for the purpose of newly providing broadband service in study areas where total support already is subject to the \$250 per line monthly cap. Moreover, we declare that a request is not reasonable if it would require a carrier to undertake new network upgrades to newly provide broadband service to requesting customers if that would cause total monthly support that presently is under the \$250 cap to exceed the cap⁹

The Commission also made clear a rate-of-return carrier has no obligation to extend broadband-capable infrastructure in any census block that is served by an unsubsidized competitor that meets the Commission's current performance standards.¹⁰

At the time the *Declaratory Ruling* was issued, the Commission was also considering whether to revise its broadband performance obligations to require higher speeds, such as 10Mbps downstream.¹¹ The Commission reiterated, however, that if minimum speed requirements were increased, a rate-of-return carrier would only be required to provide the higher speed service if the request was reasonable:

In determining whether a particular upgrade is cost effective, the carrier should consider not only its anticipated end-user revenues from the services to be offered over that network, both voice and retail broadband internet access, but also other sources of support, such as federal and, where available, state universal service funding. Under our proposal to increase the minimum downstream speed threshold, we thus would not expect a rate-of-return carrier immediately to upgrade its entire existing infrastructure to provide 10 Mbps downstream and 1 Mbps upstream (10 Mbps/1 Mbps) to all current customers. Rather, we propose that rate-of-return carriers would take into account any revised speed standards when considering whether and where to upgrade existing plant

in the ordinary course of business and would report on progress toward this goal in preparing annual updates to their five-year service improvement plans.¹²

In a *Report and Order* released December 18, 2014 the Commission adopted several measures to address non-compliance with its CAF deployment obligations.¹³ Noting that rate-of-return carriers were required to build out their networks only on “reasonable request,” the Commission determined that non-compliance issues for RLECs should be dealt with on a case-by-case basis.¹⁴ (This differs significantly from the strict milestone-based measures applicable to other eligible telecommunications carriers (ETCs).)

The Commission further clarified that rate-of-return carriers “should report any requests that are deemed unreasonable as unfulfilled requests in their section 54.313 annual reports.”¹⁵ USAC is expected to verify that rate-of-return carriers have sufficient evidence to demonstrate that any unfulfilled requests were in fact unreasonable.¹⁶ To the extent USAC determines that insufficient evidence to support a denial of service, such finds shall be reported as “other matters.”¹⁷
